

Munters EMS 50-36-30

Air circulation fans

The EMS series is one of the flat air circulation families designed and produced by Munters, widely used in poultry (Broiler, layer) and dairy ventilation systems.

Features

- Superior durability with Munters Protect coating, 7 years warranty against corrosion
- Easy installation and maintenance
- High airflow capacity
- Reduced energy consumption
- EMS 30 features high efficiency motor, in accordance to EU regulation

Munters EMS 50-36-30 are the ideal air circulation whenever extra high airflow capacity is required. Thanks to their unique propeller design that guarantees 100% efficiency and stability.

Munters EMS series features the housing, conveyor and 6-blade propeller made in Munters Protect coated steel for extra strength and resistance against corrosion. Central hub and v-belt pulley are made of die-cast aluminum for long-lasting use.

The belt drive system enables low speed propeller, which results in reduced energy consumption and noise level, ensuring a comfortable environment for both animals and operators.

Munters EMS air circulation features unique special threaded bushes on their side panels that allow the fan to easily hang the fans on the wall and is certified noise mark divided into two sections to ensure easy maintenance.

As market leader in ventilation solutions for more than 60 years, Munters guarantees quality and a ISO 9001 certified.
